

# 10+2 Data Solutions™

## Global Data Mining, LLC

### Using 10+2 Regulations to Create Competitive Advantage

Best-in-class companies are using 10+2 as a catalyst to optimize currently inefficient processes, and creating competitive advantage in the process.

The global trade data experts at GDM can help you develop and implement a data strategy for 10+2 readiness, and incorporate requirements for Mandatory AES and EU 2009 Export Regulations while you are at it.

#### Web enabled tools and professional support to drive your data strategy

- Database Design for integration with existing computer (ERP) systems and selected ISF software...
- Data acquisition and normalization...
- Classification research services...
- Classification tools and technical support...
- Project Assessment
- Project Strategy
- Executive presentation

#### Data issues to be considered

- What data is required?
- What data currently exists?
- Who "owns" the different data elements?
- Where does the data reside today?
- In what format?
- Where should the data reside for the future solution?
- How will it be validated?
- How will it be integrated?
- How will it be updated?

#### Benefits

- Complete and accurate data ready to upload to 10+2 software application...
- Strategy, tools and business processes in place to keep data maintained and up-to-date
