

# Custom Automation Services

## Global Data Mining, LLC

### Turning trade data into information you can use

GDM has an intense focus and commitment to the technical levels of knowledge required to automate and control processes in large multinational corporate systems.

Successful automation projects require the discipline of following a time-tested formula; vision + requirements + databases + software. The Data Experts at GDM have decades of experience in reengineering and automating business processes that has driven successful results in retail, wholesale, trade, logistics and manufacturing sectors. We have developed specialized expertise in two of the four phases of successful automation projects...

1. Designing requirements for process improvement
2. Building state-of-the-art databases

#### Success Formula for World Class Automation

<i>I</i> World Class Vision	Only you can provide this
<i>II</i> Clearly Defined Requirements	 <b>GLOBAL DATA MINING</b>
<i>III</i> State-of-the-art Databases	 <b>GLOBAL DATA MINING</b>
<i>IV</i> Best-in-class Software	Buy vs. Build Decision

Our staff can be a part of your automation project team, and can even provide the project leadership if necessary. We have deep experience in project management and as an effective liaison between software users and programmers.

If you require assistance in designing requirements for process improvement or building state-of-the-art global trade databases for your automation project, please call on us for a customized solution based on your specific needs.
