### Turning trade data into information you can use

Do you have the critical information you need to measure performance and identify risks associated with your exporting operations? Inadequate oversight can lead to non-compliant trade activities, increased government scrutiny and costly penalties. Executives and global trade professionals are often lacking the information they need to effectively assess risk and improve export operations.

The US government compiles 7525-V Shipper's Export Declaration data on all of your export transactions and offers it to exporters through a FOIA request. Many exporters are not even aware they can get this data, and others find it difficult to use because of its complex formatting.

The data experts at GDM solve this problem with E-TRAC™ Trade Professional Reports.

#### Powerful Data

Your Company's trade data is analyzed using GDM's proprietary software and the worlds most powerful and comprehensive trade databases from our sister company, *CUSTOMS Info*. The E-TRAC™ Trade Professional Reports combine a succinct Executive Summary of each analysis with the complete set of Trade Data Detail behind the numbers.

#### Powerful Information

The *Executive Summary* is designed to provide executives a comprehensive yet quick overview of their export operations to make decisions, develop strategy, and assign specific projects. The *Trade Data Detail* provides the line item information that a trade professional needs to dig into the details and implement effective change.

E-TRAC™ Trade Professional provides functional, practical information with 20 different export reports, including:

<b>Operational Overviews</b>	<ul style="list-style-type: none"><li>• Exporter ID Summary</li><li>• HTS (or Schedule B) classification sorted by value</li><li>• Export summary analysis by ultimate consignee and by country</li></ul>
