

Global Trade Desktop™

Consistency and Control Worldwide

CUSTOMS Info & Global Data Mining provide global trade data and enterprise-wide data solutions to help importers and exporters around the world optimize & automate global trade processes.

The data experts at Global Data Mining have created a classification system to help trade professionals quickly build and easily maintain complex classification databases for their operations around the world.

The Global Trade Desktop™ is designed to work the way you do by combining people, tools and data into a powerful, web-based solution.

Global Trade Desktop™

1. Effectively manage large classification projects, across a geographically dispersed organization, with classification responsibility for single or multiple countries, and single or multiple business units.
2. Classification best-practices are automatically incorporated into the Desktop™ using the software as a service model (SaaS).
3. Judgment is not automated. The Desktop™ leverages state-of-the-art technology and innovative thinking to make applying judgment vastly more efficient.
4. Designed to deliver:
 - a. Rock-solid reliability
 - b. User-driven functionality
 - c. Maximum scalability
 - d. State-of-the-art security
5. Every component of the Desktop™ is configurable and customizable to your specific business needs and work flow requirements.
6. Data stored in the Desktop™ is easily shared, loaded into and used by GTM, CRM or Financial applications.

The Global Trade Desktop™ is a collaborative, web-enable classification system that lets you distribute and control the worldwide activities of creating, verifying and using critical global trade content throughout your entire enterprise.

Contact us today at info@gdmlc.com to schedule a demonstration and see how the Global Trade Desktop™ can work for you.
