

Mass Class™ Research System

HTS Classification

Turning trade data into information you can use

Are you responsible for classifying thousands of items? Are you still using individual item look-up and a spreadsheet to try and manage this process? Are you certain that all of your items are classified correctly?

You may have the expertise to properly classify all your items, but without the right tools and enough resources, you may be fighting a losing battle! A recent McKinsey study shows global trade growing from \$9 Trillion today to \$70 Trillion by 2025... Do you have the staff to handle that kind of volume increase?

Incorrect classification leads to errors in duty rates, delays at the ports and potential fines. A Purdue University Study recently stated the cost of delay is equal to ½ of 1% of the value of the goods per each day of delay. Ignoring or not funding your classification project could be costing your company hundreds of thousands of dollars, or more, every year!

GDM's Mass Class™ Research System provides the additional resources you need to classify and organize thousands or even hundreds of thousands of items...

Quickly ~ Accurately ~ Economically.

We've created a system that works the way you do by combining people, tools and data into an integrated solution. Our researchers input classification information including item pictures, supportive rulings and other pertinent information and publish it to a secure server for your approval online. A classification database lets you store a much wider variety of data, gain more insight into your business, and securely share the information across a network.

Features	Benefits
Research	<ul style="list-style-type: none">• Gets thousands of items classified rapidly and accurately• Leverages your experience• Improves your ability to make decisions quickly• Uses your time to manage and validate results
Documentation	<ul style="list-style-type: none">• Assigns every item an HTS code• Supports every HTS code with a ruling when available• Automates classification documentation
Database Structure	<ul style="list-style-type: none">• Improves visibility• Streamlines classification and update maintenance• Easily integrated with other computer systems for improved classification control

The Mass Class™ Research System frees you from the administrative burden of classification and gives you time to execute your oversight as a trade professional. We do the research, you approve the results.
