

# Matrix Xpress™ Research System

## HTS Conversion

### Turning trade data into information you can use

Are you responsible for classifying thousands of items? Do you need HTS numbers for dozens of countries around the globe? Are you still using manual research and a spreadsheet to try and manage this process? The data experts at Global Data Mining can help.

A recent McKinsey study shows global trade growing from \$9 Trillion today to \$70 Trillion by 2025... Do you have the staff to handle that level of volume increase?

Incorrect classification leads to errors in duty rates, delays at the ports and potential fines worldwide. A Purdue University Study recently stated the cost of delay is equal to 1/2 of 1% of the value of the goods per each day of delay. Ignoring or not funding your global classification project could be costing your company hundreds of thousands of dollars, or more, every year!

GDM's Matrix Xpress™ Research System provides the additional resources you need to classify thousands or even hundreds of thousands of items, for multiple countries around the globe...

*Quickly ~ Accurately ~ Economically.*

Global HTS conversion can not be automated so we've created a system that leverages research, tools, data and judgment into an integrated solution. Our researchers use our proprietary HTS converter and electronic links to other country HTS data to facilitate HTS conversion research. Results are delivered in a customized database organized for easy approval and integration.

Features	Benefits
Research	<ul style="list-style-type: none"> <li>• Gets thousands of items classified rapidly and accurately</li> <li>• Gets HTS numbers converted for every country</li> <li>• Improves your ability to make decisions quickly</li> <li>• Uses your time to manage and validate results</li> </ul>
Documentation	<ul style="list-style-type: none"> <li>• Assigns every item an HTS code for every country</li> <li>• Uses hyperlinks for easy-to-use storage of rulings, other classification justifications, item specifications, etc</li> <li>• Electronic classification documentation and storage</li> </ul>
Global Matrix Database	<ul style="list-style-type: none"> <li>• Custom designed for your unique requirements</li> <li>• Designed to capture existing trade data from disparate sources</li> <li>• Easily integrated with other computer (ERP) systems or trade systems for improved control and visibility</li> <li>• Securely shares information across a global network</li> </ul>

The Matrix Xpress™ Research System frees you from the administrative burden of classification and HTS conversion providing you extra time to execute your oversight as a trade professional. We do the research, you approve the results.

Contact us today at [info@gdmlc.com](mailto:info@gdmlc.com) to schedule a demonstration and see how the Matrix Xpress™ Research System can help you tackle your classification and HTS conversion project.
